

NSTAR Gas
Energy Efficiency Program Changes
Residential Programs

| Program Name | Program Year 2002 | Modifications Planned for Program Year 2003 |
|---|---|---|
| ENERGY STAR Clock Thermostat | | No Modifications Planned for Program Year 2003. |
| ENERGY STAR Homes | | No Modifications Planned for Program Year 2003. |
| High Efficiency Heating Rebate | \$200 per furnace installed with AFUE rating \geq 90% | Beginning this year, the program will offer a \$400 mail-in rebate for the installation of high efficiency gas furnaces at the 92% Annual Fuel Utilization Efficiency level equipped with electronic commutated motors, or equivalent advanced furnace fan system. This program will be offered in conjunction with participating electric energy efficiency program administrators. (All other rebates remain the same). |
| High Efficiency Water Heating Rebate | | No Modifications Planned for Program Year 2003. |

Energy Efficiency Program Changes
Residential Programs
(continued)

| Program Name | Program Year 2002 | Modifications Planned for Program Year 2003 |
|--|------------------------------|---|
| Weatherization | | No Modifications Planned for Program Year 2003. |
| Massachusetts Building Code Support | | There are no modifications currently planned for the Program Year 2003. However, in addition to continued sponsorship of training and outreach efforts on changes to Chapter 13 of the Commonwealth of Massachusetts building energy code, NSTAR Gas plans to take advantage of additional partnership opportunities (e.g., Energy Star Homes code training) to increase education, support, and adherence to residential building codes. |
| Market Transformation | | No Modifications Planned for Program Year 2003. |
